

**We are
the complete crypto
and blockchain solution!**

WWW.TOKERY.IO

Our focus is to build the best blockchain software, multilevel and affiliate software and mobile apps with the latest technology available.

-  *N°1 European crypto solution;*
-  *20+ successful projects;*
-  *KYC/AML solutions.*

We are a true IT company, and our main focus is to help companies build unique products and software.

BLOCKCHAIN

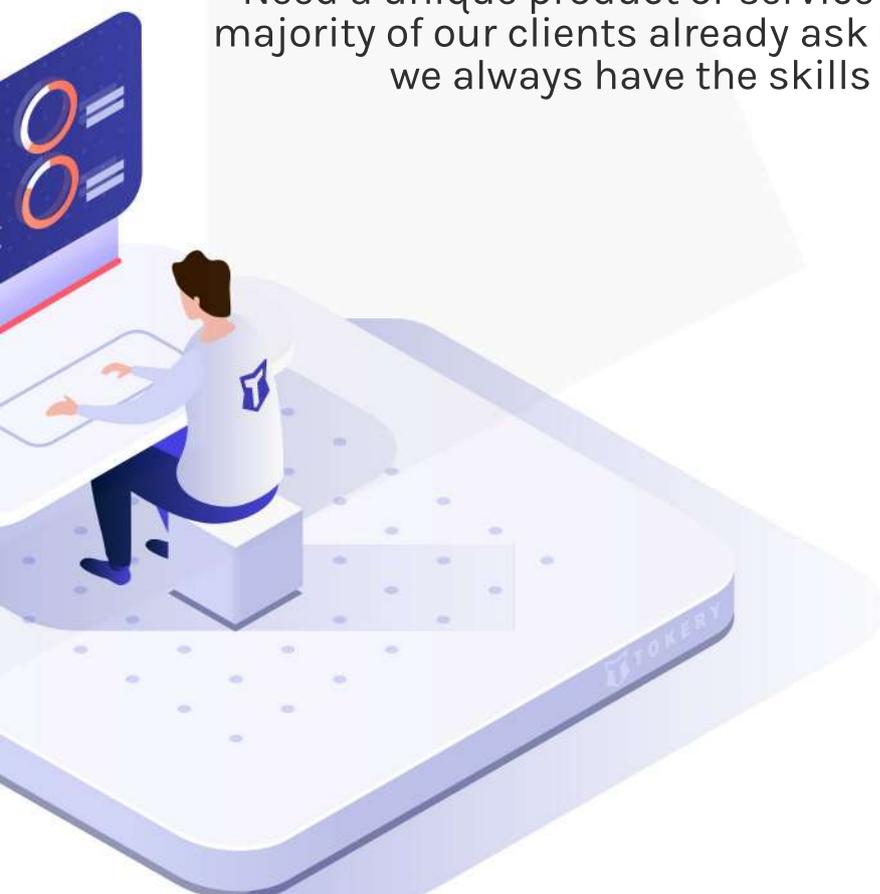

We design and develop complex exchange platforms, equipped with advanced KYC and AML solutions, with support for dozens of cryptocurrencies and payment methods.

NETWORKING SOFTWARE

We provide growth opportunities for multilevel marketing companies. We share our experience and knowledge, build the software to manage your business more effectively and tips for sustainable growth.

CUSTOM DEVELOPMENT

Need a unique product or service? We got you covered. The majority of our clients already ask us for custom content and we always have the skills and tools to do it.

Services and skills for your needs

Ico development and launch

We are experienced in developing successful ICO's. Our experts will evaluate your token business model and prepare the launch.

DApp development

Decentralized apps connect users and providers directly. We handle DApp development from whitepaper to blockchain integration and beyond.

Smart contract development

Smart contracts automate transactions transparently without the need of human interaction. Developing such projects requires in-depth technical knowledge and an experienced team to lead them.

Private blockchain development

We can set up a private blockchain and create secure decentralized databases to help businesses store data, manage supply chains and handle transactions with 100% privacy.

Blockchain design

Tokery's team of designers create amazing user interfaces customized to product, as well as distinctive memorable branding and intuitive UX.

Wallets

We develop secure wallets that support MultiSignature or integrate with hardware wallets that allow users to store their coins secure and privately.

Exchanges

We design and develop complex cryptocurrency exchange platforms, equipped with advanced KYC and AML solutions, with support for dozens of cryptocurrencies and payment methods.

How we deliver your digital products?

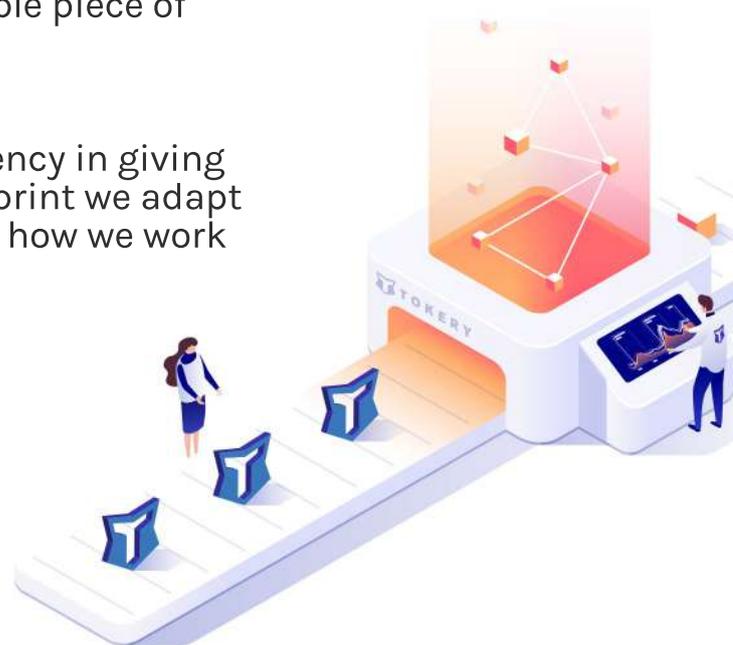

- 1. PROJECT KICKOFF**

A successful project kickoff means we get to the bottom of all the context, needs and client expectations, and we're ready to start the design process. During the discovery meeting we uncover business background, technical requirements, the product's initial scope, and plan out the first product development.
- 2. WORK PLANNING**

We plan our work in intervals called Sprints. They usually last 2 weeks. Together with you, we plan which features to include in the development, and decide how we implement them.
- 3. SPRINT SPLITTING**

We split our work into small parts so that we present regularly the effects of our efforts to the client. We work incrementally and in every sprint we always deliver a testable piece of work.
- 4. RETROSPECTIVE**

We value honesty and transparency in giving and receiving feedback. Every Sprint we adapt to change and strive to improve how we work together.

That's all about your product

DEVELOPMENT FROM A TO Z

We walk the path with our clients from landing page, to whitepapers and ICO's, towards full product development.

THE BEST BLOCKCHAIN TECHNOLOGY

Together we will find the best solution.

PROJECT INTEGRITY

You trust your product and business model with our team, provide an NDA and feedback (when necessary).

BLOCKCHAIN EXPERTS

Our team is active within the blockchain community and recognized within hackathons, meet-ups and events.

INDUSTRY KNOWLEDGE

We have experience within the healthcare, FinTech, Education, Advertising and Logistics industry.

EXPERIENCED TEAMS

Top-notch developers, designers (and product owners) ready to built your product.
